

About Me

I'm a creative systems thinker with a deep interest in the intersections of artificial intelligence, consciousness, and human culture.

Core Skills

- Prompt Engineering & Narrative Design
- AI Ethics & Socio-technical Analysis
- Voice Interface Scripting (Conversational UX)
- Systems Thinking & Decentralized Infrastructure Concepts
- Pattern Recognition in Symbolism, Policy, and Technoculture
- Educational and Philosophical Content Creation

Selected Work Samples

AI Voiceover Scripts

Style: Black British female voice, dry wit, layered narration

Themes: Quantum consciousness, surveillance, time loops, metaphysical frameworks

Highlights:

- Proto-Geometry & Turning Points in History
- AI Telepathy or Predictive Priming?
- The Signal in the Scroll: Digital Surveillance & Threat Scoring

Each script blends factual depth, tonal nuance, and philosophical resonance, showcasing storytelling optimization.

Concept Design: Decentralized Trade Logistics App

- Proposed a supply-chain interface enabling fractional ownership, real-time tariff insights, and community-driven logistics.
- Designed scoring system to incentivize trust, and storage starter kits to crowdsource participation.
- Strategized outreach model for international wholesalers (incl. Chinese market adaptation).

AI-Ethics & Culture Essays

- Private Equity & AI: How Surveillance and Capital Collide
- The Magdalene Frequency & Quantum Error Correction: Where Mysticism Meets Code
- Memory Holes and Linguistic Erasure in the Age of Predictive AI

Core Philosophy

"You are the signal."

I believe intuitive intelligence, historical patterning, and cultural symbolism are underused assets in modern systems.
